EDUCATION

Vellore Institute of Technology, Bhopal

B.Tech - Computer Science and Engineering - CGPA - 8.48

2023– 2027

Bhopal, Madhya Pradesh

EXPERIENCE

Google Developer Groups On Campus, VIT Bhopal University [↗](#)

Aug-2025 – Present

Technical Lead

Bhopal, MP

- Led and coordinated a **35+ member technical team**, ensuring successful execution of projects, technical challenges, and problem-solving initiatives.
- Design and built the club's first official website and event platform through collaboration with web team, achieving **300+ unique visitors** and **1.1K+ overall visits**. [Club Website](#) [↗](#)
- Fostered innovation by encouraging and guiding members to work on cross-domain technical projects.
- Hosted an alumni podcast event **attended by 90+ participants**, ensuring smooth audience engagement and session flow.

VITERA Club, VIT Bhopal University [↗](#)

Aug-2024 – 2025

Core Team Member

Bhopal, MP

- Co-developed the club website to improve user accessibility and online presence.
- Managed event operations and audience engagement for an event with 100+ students.

Clozdesign [↗](#)

Brand Ambassador

- Acquired 15+ new customers by leading on-ground marketing during a major college event.
- Promoted the brand across multiple college campuses to increase product visibility and reach.

PROJECTS

IPDR Communication Analysis Mapping Tool [↗](#)

- A web-based analytics platform designed for investigators to map A-party to B-party communications from large-scale telecom records.
- Designed interactive dashboards featuring geographic mapping and query-based investigation tools to simplify complex intelligence analysis.
- Engineered a scalable system capable of efficiently processing and filtering multi-format data, significantly reducing manual data parsing.

SafeSphereAI [↗](#)

- A Chrome extension focused on user safety by providing real-time detection of harassment and unsafe content across platforms like Gmail and Twitter.
- Integrated third-party automated moderation APIs to analyze text toxicity and image safety, directly improving the end-user experience.
- Optimized the product's performance and reduced response latency by implementing background processing and caching, ensuring a seamless user experience.
