EDUCATION

Vellore Institute of Technology, Bhopal

B.Tech - Computer Science and Engineering - CGPA - 8.48

2023– 2027

Bhopal, Madhya Pradesh

EXPERIENCE

Google Developer Groups On Campus, VIT Bhopal University ↗

Aug-2025 – Present

Technical Lead

Bhopal, MP

- Led and coordinated a **35+ member technical team**, ensuring successful execution of projects, technical challenges, and problem-solving initiatives.
- Design and built the club's first official website and event platform through collaboration with web team, achieving **300+ unique visitors** and **1.1K+ overall visits**. [Club Website](#) ↗
- Fostered innovation by encouraging and guiding members to work on cross-domain technical projects.
- Hosted an alumni podcast event **attended by 90+ participants**, ensuring smooth audience engagement and session flow.

PROJECTS

IPDR Communication Analysis Mapping Tool ↗

- Built a **web-based IPDR analytics platform** to extract and map A-party to B-party communications from large-scale telecom records for investigative analysis.
- Built interactive dashboards with network visualizations, geographic mapping, and query-based investigation tools for communication intelligence analysis.
- Engineered a scalable parser for multi-format telecom records, enabling efficient processing and filtering of large communication datasets.

SafeSphereAI ↗

- Built a Chrome extension that provides **real-time harassment and unsafe-content detection** across Gmail and Twitter.
- Integrated Bytez.js and Sightengine APIs to perform automated text-toxicity and image-moderation analysis for user safety.
- Reduced repeated API calls and improved response latency using Redis caching and asynchronous background processing.

RescueMesh ↗

- Built a **peer-to-peer disaster communication system** that enables messaging over local networks without requiring internet, cellular networks, or centralized servers.
- Implemented automatic peer discovery using mDNS and group communication using libp2p GossipSub, allowing users to join chat rooms with zero configuration.
- Designed a command-line interface for creating and managing peers across Wi-Fi/Ethernet LANs, supporting seamless multi-device communication.

TECHNICAL SKILLS

Languages: Go(Golang), JavaScript, SQL

Frameworks & Technologies: React, Node.js, Express.js

Database: MongoDB, PostgreSQL

Developer Tools: Git, GitHub, Docker, VS Code

EXTRACURRICULAR

Secured **3rd Place**, CyberShield Hackathon (WiCys Club)

Secured **1st Place**, Collegiate Chess League (CCL), Group D – 2024

Technical Core Team Member Vitera Club Sep 2024 – Sep 2025

Solved **200+** coding problems across multiple platforms
